

You Completed Your Liver Test... NOW WHAT?

Think Liver
Think Life 

LIVERSTAT Test

You just had a LIVERSTAT test. This test uses your blood test and basic information, like your age and body size, to check your liver. It helps your care team see if your liver is healthy and if there are any problems.

Test Results

Your care team at the clinic will be the first to give you your LIVERSTAT results. They will tell you what the results mean and what to do next, if needed.

Connection to Care Call

In 2 to 4 weeks, a Certified Health Education Specialist from American Liver Foundation will call or text you. They can answer your questions, share tips for healthy eating and moving your body, and help you find support and resources near you.

FREE MyFitnessPal Subscription

Someone from American Liver Foundation (with an email ending in @liverfoundation.org) will email you a code for a free year of MyFitnessPal Premium. This app helps you track your food, exercise, and learn more about healthy eating.

American Liver Foundation Helpline

If you have questions or need support, you can call American Liver Foundation's Helpline at 1-800-465-4837 or email info@liverfoundation.org.

American Liver Foundation (ALF) is a nonprofit organization dedicated to advancing education, support services, advocacy, and research for the prevention, treatment, and cure of liver disease. ALF is not federally funded.
